

CLAIMS

1. An image detector for creating digital dental images, characterized in that means for receiving and storing administrative data are present.
5
2. An image detector as defined in claim 1, characterized in that means for displaying administrative data are provided.
3. An image detector as defined in claim 1 or claim 2, characterized in that means for transmitting administrative data are provided.
10
4. An image detector as defined in claim 3, characterized in that means for transmitting image data are provided.
- 15 5. An image detector as defined in any one of claims 1 to 4, characterized in that an actuating element is provided.
6. An image detector as defined in any one of claims 1 to 5, characterized in that an energy storage device for supplying energy to the display is present.
20
7. An image detector as defined in any one of claims 1 to 6, characterized in that a storage device for the signals produced by the X-rays is provided.
- 25 8. An image detector as defined in claim 7, characterized in that the storage device is a digital memory and that means for transforming the signals produced by the X-rays to digital signals are present.
- 30 9. An image detector as defined in any one of claims 1 to 8, characterized in that a display showing the state of the image detector is present.
